Sherlock Holmes was certainly not referring to recorder duets when he made this statement; however, we're going to adopt his problem-solving skills ourselves and address some two-recorder/pipe conundrums while playing a few fantastic duos. We'll discuss tuning (let's get those pure 5ths! Where should those 3rds be placed?), articulations, phrasing, breathing, and how to coordinate them all with your duet partner - even if they are virtual!

Only in Venice

"Noah's Violin," by sculptor Livio De Marchi, floats during a concert on the Grand Canal in Venice, Italy, on Saturday, September 18. The approximately 39 foot (12 meter) long craft is a tribute to Covid-19 victims, according to the City of Venice. [A string quartet performed Vivaldi](#) as it made its way along the canal.

Editorial comment – If you click on the link you will see and hear more about this amazing floating violin and the musicians playing on its top. Or is it its deck??
